DETAILED ACTION***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The instantly claimed process for the preparation of 2,3,5-trimethyl-1,4-hydroquinone diacylates is neither disclosed nor fairly suggested by the closest prior art: Takahashi et al (US 5,908,956 06-1999) and Rona (US 3,920,582 11-1975). Applicants have persuasively argued (Remarks, page 4, 3rd full paragraph) that one of ordinary skill in the art would not have been motivated to use the heterogeneous catalysts of Rona in the acylation reaction of Takahashi since the reaction chemistry of the two references are very different. Because of these different chemistries one of ordinary skill in the art would not have had a reasonable expectation for success in substituting the silica-supported catalyst of Rona for the polymer-supported catalyst employed in the process of Takahashi. The instantly claimed process is therefore patentable over the teachings of Takahashi and Rona, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
